

Wajahat Ali

Automation & AI Specialist

Lahore, Punjab, Pakistan • dablewcodes@gmail.com • 03167931526 • www.linkedin.com/in/dablewcodes

AI and Automation Specialist with a passion for leveraging AI to enhance business operation and drive data-driven decision-making. Skilled in Automation, Scripting, Scraping, Analytics & AI Integration.

PROFESSIONAL EXPERIENCE

Software Support Engineer | Ember AI | Remote

April 2026–Present

- Provided customer support to help clients maximize the value of Ember.AI, an AI-powered vibecoding platform.
- Assisted clients in setting up local development environments and troubleshooting/debugging technical issues to ensure a smooth development experience.

Lead AI Automation Engineer | Buildberg | Remote

Nov 2025–Present

- Led 10+ end-to-end automation projects using Zapier, Make, n8n, APIs, and AI agents, streamlining client operations and reducing manual workload.
- Managed direct client communication, translating business requirements into scalable automation solutions.
- Vibe coded full stack (Next.js & FastAPI) web apps integrated with third party APIs and cloud services.

AI Automation Engineer | Buildberg | Lahore, Punjab, Pakistan

April 2025–Nov 2025

- Developed automations for data processing tasks and workflows, significantly reducing manual effort using tools like Make, Zapier, n8n.
- Setup analytics and automations in data platforms like Airtable, Looker Studio & Google Sheets.
- Created AI agents equipped with various tools in platforms like n8n, Relevance AI, & Vapi.
- Wrote custom Python and Google Apps Script automations for API integrations, data processing, and scraping.
- Built lead generation, profiling, and enrichment automations by integrating third-party data providers and scraping tools to improve lead quality and targeting.
- Developed complete sales and marketing funnels and automations in GoHighLevel CRM.

Junior Python Developer | Evan Carmichael Communications Group | Remote

April 2023–Nov 2024

- Streamlined data cleaning and record management processes using Python scripts, cutting turnaround time in half.
- Created a comprehensive ETL script for monitoring social media metrics for 500+ users, automating report generation and alerts.
- Developed an AI-driven tool utilizing GPT-4 for optimizing YouTube content presentation, enhancing viewer engagement through testing and analysis.
- Constructed a multilingual dubbing application, integrating audio transcription, translation, and voice generation functionalities.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | University of Engineering and Technology, Taxila | CGPA : 3.20

June 2024

SKILLS

Make/Zapier/n8n

Python

SQL
